EXPERIENCE

IBM **Jan 2026 – May 2026**

AI Intern (Project-Based Internship)

- Developing an **AI-assisted Voice & Text Chatbot** to handle user queries using Natural Language Processing (NLP).
- Integrated **speech-to-text and text-to-speech** functionalities, enabling seamless voice-based interaction.
- Designed conversational flows and implemented **intent recognition models** to improve query understanding.
- Built and deployed **backend APIs** for real-time interaction and response generation.
- Enhanced response accuracy and user experience through continuous testing and optimization.

Accenture **Feb 2026 - Present**

Associate Software Engineer Trainee

- Working with HANA Database for large-scale data processing, query optimization, and performance tuning.
- Learning enterprise data workflows, backend systems, and database-driven application development.
- Collaborating on data handling and analytics-oriented solutions in an enterprise environment.

PROJECTS

House Price Prediction System — Python, Scikit-learn, Streamlit **Dec 2024 - Feb 2025**

- Built a Streamlit web app to predict property prices using a Scikit-Learn pipeline with feature engineering and Random Forest.
- Created an analytics page showing city and locality-wise real estate trends using Matplotlib and Plotly.
- Added support to upload new city datasets and generate predictions; used 99acres.com data for educational purposes only.

Laptop Recommendation System — Python, NLP, Streamlit **Jan 2024 – May 2024**

- Curated and preprocessed 1000+ laptop specifications, engineering key features for model training.
- Built a content-based recommendation engine that suggests the top 3 laptops.
- Developed an interactive Streamlit app with forms, predictions, and file upload; deployed with a modular, scalable structure and optimized inference time.

EDUCATION

University of Petroleum and Energy Studies **Aug 2024 – Present**

MCA in Artificial Intelligence & machine learning *Dehradun, India*

Bhagwan Mahavir University **Aug 2021 – May 2024**

B.Sc in Data Science *Surat, India*

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++, C, ABAP
Machine Learning & AI: Supervised & Unsupervised Learning, Deep Learning, NLP, Generative AI, Model Deployment, Feature Engineering
Libraries & Frameworks: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, XGBoost LangChain
Data Engineering & Databases: HANA Database, Data Preprocessing, Data Pipeline Management, Web Scraping
Tools & Platforms: Streamlit, Git, GitHub, Linux
Visualization: Matplotlib, Plotly
Soft Skills: Problem Solving, Analytical Thinking, Collaboration, Communication, Adaptability

PUBLICATIONS

"Elevating Large Language Model's Comprehensibility with SHAP Values"

Accepted for publication in: Revolutionizing Machine Learning with Large Language Models

Certifications

- Data Science mentorship Program - CampusX
- Sql For Data Science - Coursera
